

Career Cluster/Fair

INTERSTED IN VOLUNTEERING?

Email Kimberly Williams for more information

The Scott County Partnership works with both school districts to help students in deciding what career path they would be interested in. The programs are different for each school, but both invite members of the community to share their career experience with students. Volunteers share information such as education level, salary range, day-to-day activities, their favorite part of their job, and their not so favorite part of their job.

The Career Clusters/Fair event is a wonderful way to help students understand more about a career they may be interested in. It helps them to understand more about the career to help them decide if it a good fit for them.
